AI Super Agent for MRO

AI Super Agent for MRO

Agentic AI CMMS System

AutoDoc AI

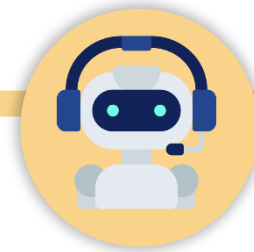

- *Auto Extraction of Bill of materials (BOM's) from manuals or part catalogues.*
- *Technical details extraction from invoices / specifications sheet.*

AI Agent

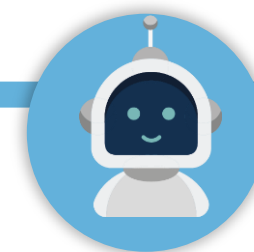

WorkSync

- *Automated Work order creation and tracking*
- *AI driven WO assignment, completion time estimate, priority resources allocation .*

Materialize

- *Asset monitoring and lifecycle management*
- *BOM linkage and new parts creation*

Sage

- *AI driven Predictive maintenance architecture*
- *Reliability centered maintenance for cost effectiveness*

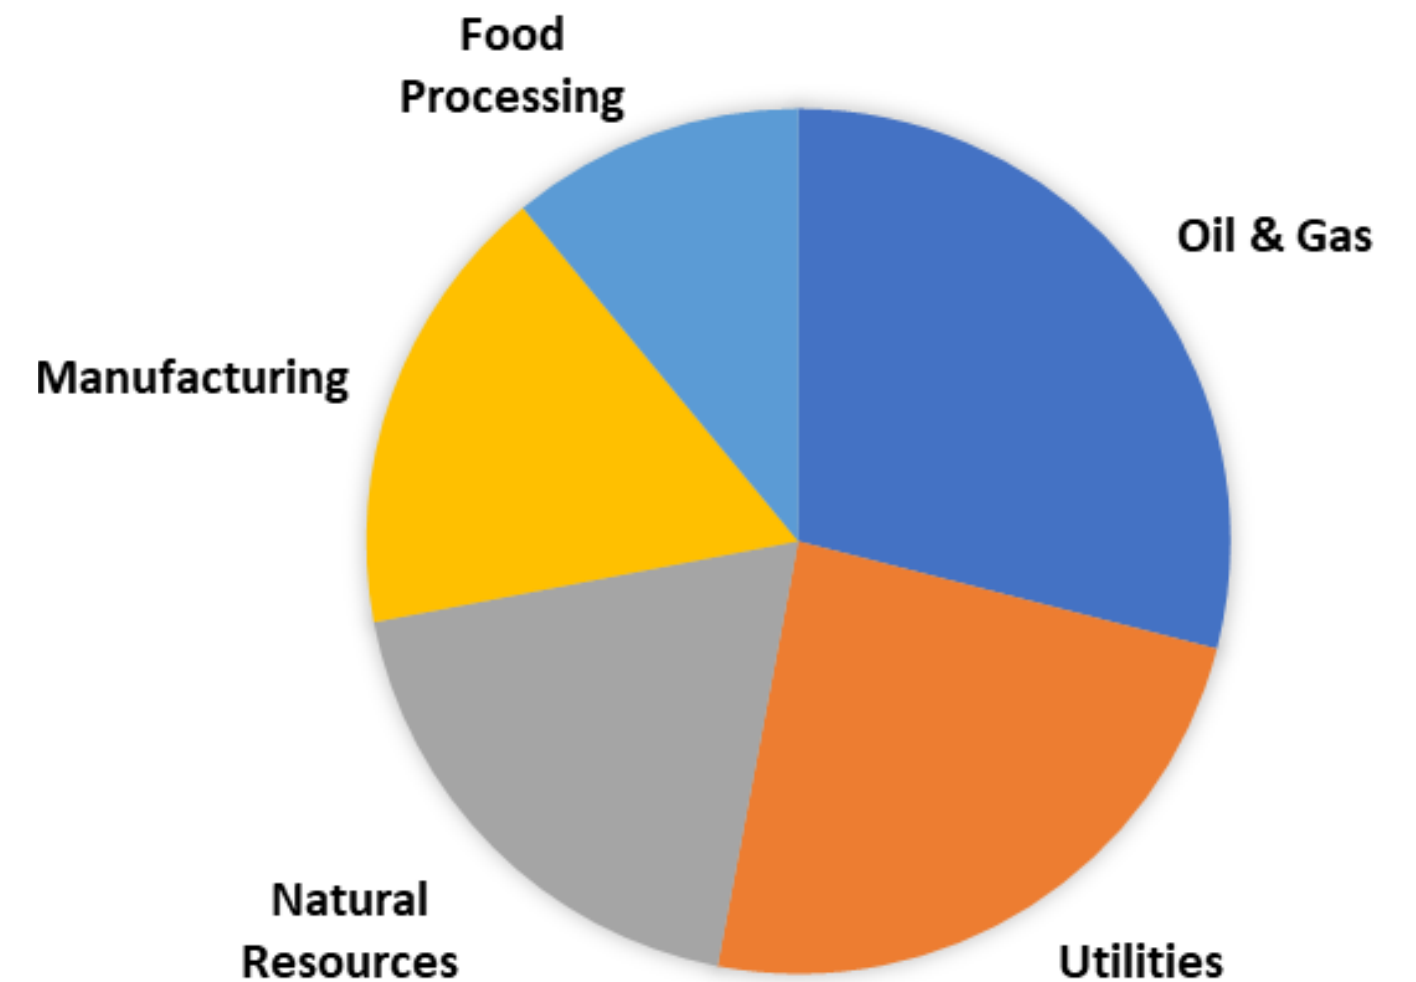

Sentry

- *Asset and spare parts criticality calculation*
- *AI driven failure scenarios and effect analysis*

**Ongoing Development*

Our Stellar Customer Base

Verdantis proudly serves encompassing top-tier companies across diverse industries. Our innovative data management solutions and exceptional customer service have earned us the trust of Fortune 500 giants and mid-sized enterprises alike. Our success stories demonstrate the effectiveness of our solutions in optimizing operations and unlocking hidden value from data.

How Verdantis Has Been Helping The Customers

- Supplier Rationalization & Consolidation
- New Product Development
- Operational Efficiency
- Partner Collaboration
- Foundation for AI Productive Use Cases
- Governance & Compliance
- Process Efficiency (20–30%)
- Higher Visibility across Org
- Cost Savings (20–25%)

Lean Inventory & Working Capital Optimization

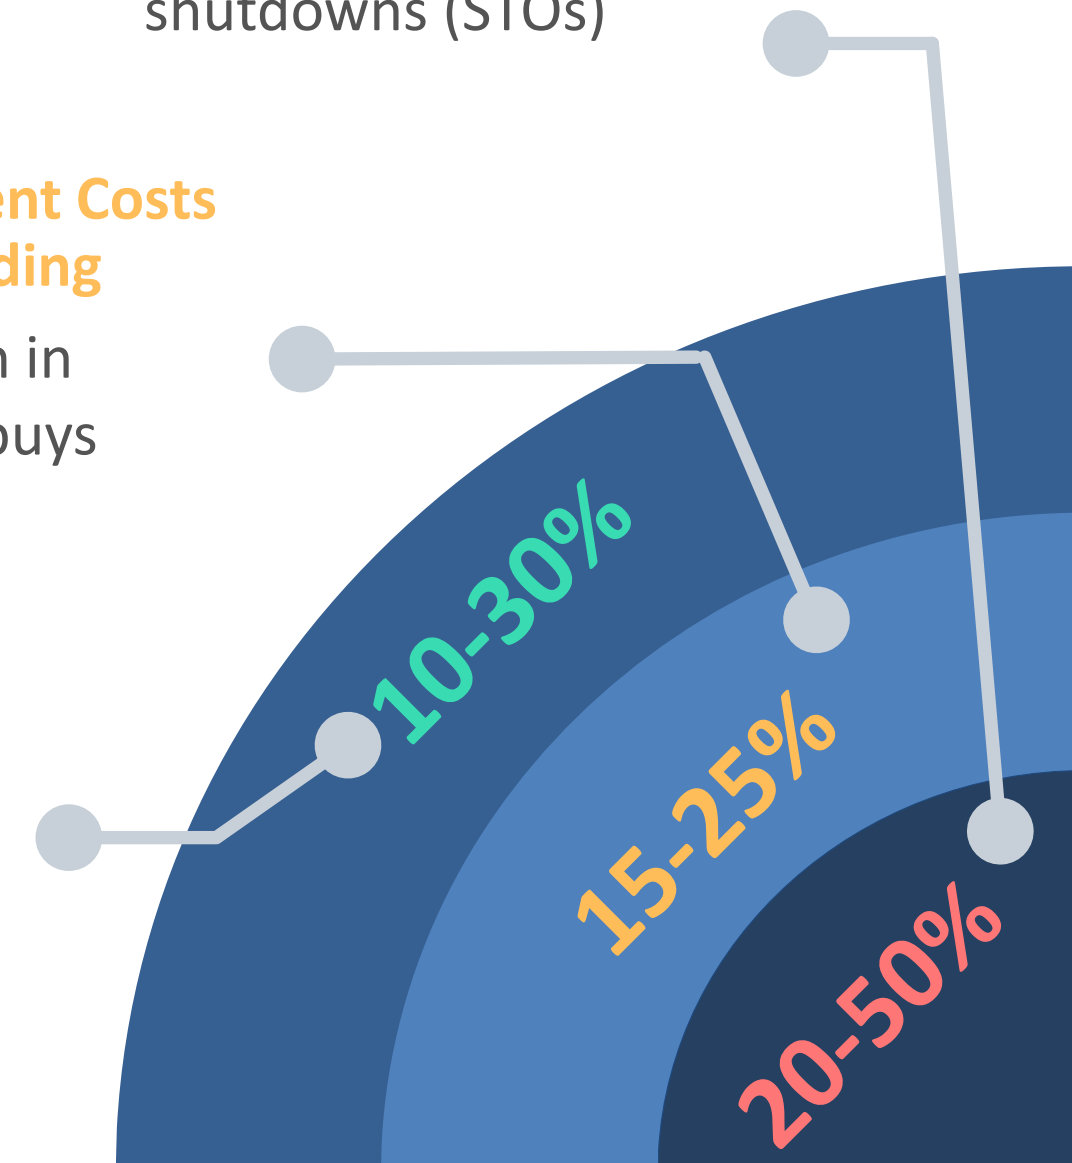

10–30% cut in inventory carrying costs

Lower Procurement Costs & Maverick Spending

15–25% reduction in emergency/spot buys

Reduced Downtime & Equipment Failure

20–50% drop in unplanned shutdowns (STOs)

Client Success Stories

Energy

A **\$1.74 billion** global water treatment provider offers solutions like wastewater reuse and reverse-osmosis cleaning. They transitioned from **18 legacy systems** to a universal SAP ERP, harmonizing 1.3 million materials and standardizing data **for 102,000 customers** and **63,000 suppliers**. They implemented Verdantis Integrity for automated data governance.

F&B

An American snack and cereal company partnered with Verdantis to standardize and cleanse over **100,000 SKUs** using automated tools and the UNSPSC system. Operating in **10 U.S. locations** with **7,000 employees** and **\$5 billion** in revenue, they addressed data inconsistencies in their materials and spare parts, reducing duplicate inventory and improving accuracy during a Maximo EAM implementation.

Manufacturing

Verdantis implemented a Master Data Management solution for a **Fortune 500 steel company** with over **\$100 billion** in revenue. The solution integrated two legacy systems, cleansed master data, reduced procurement costs, and improved inventory control. F500 Steel plants face challenges with **425,000 items** in managing numerous purchased parts and MRO supply chain inefficiencies.

Client Success Stories

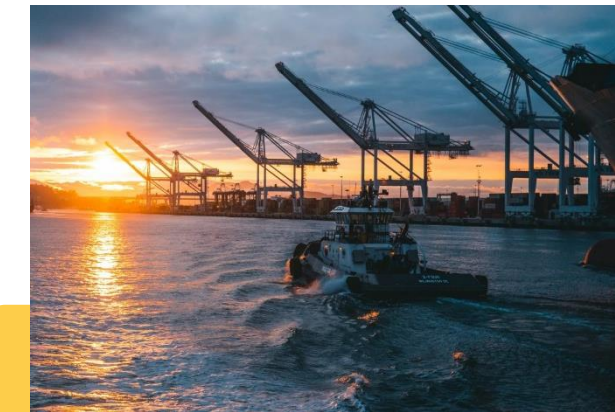

Packaging

A major US packaging company, the second-largest in paper-based solutions, based in Georgia with over **50,000 employees and \$18 billion** revenue. They standardized 1 million parts using Verdantis for automated data governance and onboarding, enriching **100k items**. With **500 active** users monthly, they integrated with IDE and Passport ERP systems, maintaining a **12+ year integrity license for global**, multilingual operations.

Manufacturing

A Fortune 500 Forest Products Company, **with \$22.5 billion** in annual revenue and operations in **18 countries**, streamlined their SAP ERP systems by consolidating legacy systems across **19 pulp paper mills & 200 packaging** locations. The project, the largest SAP ERP consolidation in North America, used Verdantis' AI tools to rationalize **over 400,000-line items**, reducing duplicate identification from **20% to 4%**, enhancing overall efficiency.

O&G

This US-based company, a global leader in mechanical components and equipment for land and offshore drilling rigs, also offers supply chain services through strategic distribution centers. With over **800 manufacturing, sales, and service centers** worldwide and annual revenues exceeding **\$12 billion**, the company provides tailored solutions to meet the energy industry's quality, productivity, and environmental needs.

Verdantis Overview: AI Powered Data Platform

Verdantis is a leading AI-powered data platform designed to streamline and enhance your data management processes. With advanced artificial intelligence, Verdantis ensures your data is accurate, enriched, and ready for use, empowering you to make informed decisions with confidence.
